COURSE OBJECTIVES

The Masterclass is designed to provide an in-depth overview of the Da Vinci Single Port (SP) system applied to thoracic surgery. Through dedicated theoretical and live surgery sessions, participants will have the opportunity to directly observe advanced robotic procedures and learn the key tips and tricks that enhance the safety, precision and efficiency of this newborn, innovative surgical technique.

The course aims to offer a comprehensive and practical understanding of the Da Vinci SP platform, which represents the most significant and recent advancement in the field of minimally invasive thoracic surgery.
